

# ECRA workshop: High Impact Events and Climate Change

- DATES** 3-4 June 2013
- LOCATION** Fjordslottet Hotel ([www.fjordslottet.no/](http://www.fjordslottet.no/)), Bergen, NO  
Accommodation for the night 3-4 June is covered by ECRA, the Bjerknes Centre and met.no
- ORGANIZATION** This workshop is organized by the European Climate Research Alliance. For informal enquiries about the programme, please contact Michel d.S. Mesquita ([michel.mesquita@uni.no](mailto:michel.mesquita@uni.no)) or Peter Braesicke ([peter.braesicke@atm.ch.cam.ac.uk](mailto:peter.braesicke@atm.ch.cam.ac.uk))
- REGISTRATION** <http://www.ecra-climate.eu/index.php/?id=31>

This Collaborative Programme workshop will examine how high impact events work, how they can be simulated accurately in numerical models, and how we might be able to project future changes and impacts reliably. It will continue the process started in Cambridge last year, establishing new partnerships between European scientists.

## GOALS OF THE WORKSHOP – open to all interested scientists and stakeholders

- Presentations of on-going research activities, including **extreme winds** and **precipitation**
- Discussion of emerging observational and modelling requirements
- Identification of critical knowledge gaps and beneficial collaborations
- Formulation of a work plan based on the existing [position paper](#)

**The workshop will inform the ECRA board on how to shape the future of ECRA!**
